 feet, said depth measurement having been furnished me by tubing

tally; that the purpose of setting this packer was to
 effect a seal in the annular space between the two strings of pipe where the
 packer was set so as to prevent the commingling, in the bore of this well, of
 fluids produced from a stratum below the packer with fluids produced from a
 stratum above the packer; that this packer was properly set and that it did,
 when set, effectively and absolutely seal off the annular space between the
 two strings of pipe where it was set in such manner as that it prevented any
 movement of fluids across the packer.
