HEARINGS DIVISION**

**OIL AND GAS DOCKET
NO. 08-0282700**

**IN THE MARTIN (CONSOLIDATED) AND
FUHRMAN-MASCHO FIELDS, ANDREWS
COUNTY, TEXAS**

**FINAL ORDER
APPROVING TRANSFER OF GOLDSMITH NORTH, SAN ANDRES CONSOLIDATED
UNIT (GNSAU) WELLS FROM THE MARTIN (CONSOLIDATED) FIELD
TO THE FUHRMAN-MASCHO FIELD
ANDREWS COUNTY, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on August 1, 2013, the presiding examiners have made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiners' report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is **ORDERED** by the Railroad Commission of Texas that the drilled and permitted wells operated by Pecos Operating Company, L.L.C., in the Goldsmith North, San Andres Consolidated Unit (Lease No. 40071) are hereby transferred from the Martin (Consolidated) Field (Field ID 57774 275) to the Fuhrman-Mascho Field (Field ID 33176 001). The operator is required to file Commission Form P-4, 'Producer's Transportation Authority and Certificate of Compliance', for all affected wells and leases. The Commission also waives any fees associated with such transfer, including drilling permit fees.

Done this 24th day of September, 2013.

Done in Austin, Texas on September 24, 2013.

RAILROAD COMMISSION OF TEXAS

CHAIRMAN BARRY T. SMITHERMAN

COMMISSIONER DAVID PORTER

COMMISSIONER CHRISTI CRADDICK

ATTEST:

SECRETARY

(PECOS VALLEY (FUSSELMAN #2) FIELD - Cont'd.)

The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well, and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each one hundred sixty (160) acre proration unit.

In applying this rule the general order of the Commission with relation to the subdivision of property shall be observed.

RULE 2. The acreage assigned to the individual oil well for the purpose of allocating allowable oil production thereto shall be known as a proration unit. No proration unit shall consist of more than one hundred sixty (160) acres except as hereinafter provided, and the two farthestmost points in any proration unit shall not be in excess of forty five hundred (4500) feet removed from each other; provided, however, that in the case of long and narrow leases or in cases where because of the shape of the lease such is necessary to permit the utilization of tolerance acreage the Commission may after proper showing grant exceptions to the limitations as to the shape of proration units as herein contained. All proration units, however, shall consist of continuous and contiguous acreage which can reasonably be considered to be productive of oil.

If after the drilling of the last well on any lease and the assignment of acreage to each well thereon in accordance with the regulations of the Commission there remains an additional unassigned lease acreage of less than one hundred sixty (160) acres, then and in such event the remaining unassigned lease acreage up to and including a total of forty (40) acres may be assigned to the last well drilled on such lease or may be distributed among any group of wells located thereon so long as the proration units resulting from the inclusion of such additional acreage meets the limitations prescribed by the Commission.

Operators shall file with the Commission certified plats of their properties in said field, which plats shall set out distinctly all of those things pertinent to the determination of the acreage credit claimed for each well; provided that if the acreage assigned to any proration unit has been pooled, the operator shall furnish the Commission with such proof as it may require as evidence that interests in and under such proration unit have been so pooled.

RULE 3. The daily total field oil allowable, as fixed by the Commission after deductions have been made for marginal wells, high gas-oil ratio wells and wells which are incapable of producing their allowables as determined hereby, shall be distributed among the wells producing in the field capable of making their allowables in that proportion that the acreage assigned to each well bears to the sum of the acreage assigned to all of the wells in the field.

IT IS FURTHER ORDERED That this cause be held open on the docket for such other and further orders as may be necessary.

FUHRMAN-MASCHO FIELD
Andrews County, Texas

Special Order No. 8-65,109, Rescinding Rules Previously Adopted and Adopting Revised Operating Rules for the Fuhrman-Mascho Field, Andrews County, Texas, Effective June 23, 1975, as Amended by Orders Effective August 1, 1987, January 7, 1997, September 7, 2005, November 6, 2007, June 24, 2008, and October 20, 2008.

Order No. 8-65,109 rescinds:

Order No. 8-7637, effective September 25, 1944, combining the Fuhrman and Mascho Fields and adopting rules for the Fuhrman-Mascho Field;

Order No. 8-9359, effective July 29, 1946, Order No. 8-34,807, January 1, 1957, Order No. 8-43,812, effective June 27, 1960, and Order No. 8-55,840, effective December 27, 1965, amending rules.

Order No. 8-34,807, effective January 1, 1957, combined the Fuhrman-Mascho (4270' San Andres), Fuhrman-Mascho (Grayburg-San Andres), Fuhrman-Mascho (Grayburg Reservoir) Fields, the Plateau and Weaver Areas of Fuhrman-Mascho Field and Nix (4400' Dolomite) Field into the Fuhrman-Mascho Field.

ORDER

Following notice and hearing this application was duly considered by the assigned Examiner who has filed a Proposal for Decision containing his findings of fact and conclusions of law, and said Proposal for Decision is incorporated herein and made a part of this order.

We are of the opinion that the current rules are inadequate for the above referenced reservoir and should be revised.

(FUHRMAN-MASCHO FIELD - Cont'd.)

Accordingly it is ordered that effective June 23, 1975, the following rules are adopted to govern the drilling, completion and production of wells in the Fuhrman-Mascho Field, and that all previously adopted rules in conflict herewith are hereby rescinded.

RULE 1. (As Amended by Order Nos. 08-0214381, 08-0214391, and 08-0214392, Effective January 7, 1997, and Order No. 08-0253252, Effective November 6, 2007.) The designated correlative interval consists of: Grayburg Reservoir interval from 3,990 feet to 4,302 feet and the San Andres Reservoir interval from 4,302 feet to 5,456 feet as shown on the Laterlog of the Magnolia Petroleum Company's Leta Jones Lease, Well No.3, Section 11, Block A-42, PSL Survey, Andrews County, Texas.

RULE 2. (As Amended by Order No. 08-0243602, Effective September 7, 2005, and Amended and Renumbered (Formerly Rule 1) by Order No. 08-0253252, Effective November 6, 2007.) No well for oil shall hereafter be drilled nearer than three hundred and thirty (330) feet to any property line, lease line or subdivision line and there shall be no between well spacing requirement. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well; and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed, whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefor shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference.

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

RULE 3. (As Amended and Renumbered (Formerly Rule 2) by Order No. 08-0253252, Effective November 6, 2007, and Amended by Order No. 08-0258732, Effective October 20, 2008.) The acreage assigned to the individual oil well shall be known as a proration unit. The standard drilling and proration units are established hereby to be forty (40) acres. No proration unit shall consist of more than forty (40) acres except as hereinafter provided. If after the drilling of the last well on any lease there remains an additional unassigned acreage of less than forty (40) acres, then and in such event the remaining unassigned acreage up to and including a total of twenty (20) acres may be assigned as tolerance acreage to the last well drilled on such lease. An operator, at his option, shall be permitted to form optional drilling units of five (5) acres. No proration unit plats are required.

RULE 4. (Rescinded by Order No. 8-87,886, Effective August 1, 1987.) Casing and Multi-Stage Cementing Rule.

RULE 4. (As Amended and Renumbered (Formerly Rule 3) by Order No. 08-0253252, Effective November 6, 2007, and Amended by Order No. 08-0256755, Effective June 24, 2008.) The field is classified as salvage with no restriction on oil or casinghead gas.

RULE 5. (As Amended by Order No. 08-0253252, Effective November 6, 2007, and Rescinded by Order No. 08-0256755, Effective June 24, 2008.) Permitted Gas-Oil Ratio.

It is further ordered that all accumulated overproduction in the Fuhrman-Mascho Field is cancelled.
