Hi Mary,

I submitted a W10 this morning showing this well shut in as of Dec 2019.

Thank you,

Please note my new email is lisa.veloski@exxonmobil.com

Good morning Patty,

I wanted to confirm per our conversation this morning, I should use 01/01/20 as the shut-in date for Univ Blk 9 SAU.

Thanks,
Mary Moore | Regulatory Analyst | University Lands

Hi Mary, Josh is new to this area and I believe he did not understand we needed all history not just this past year. The well is producing from both laterals so please let me know if we need to submit a revised W2 showing both laterals as active. Looping in Carolyn Dean as she will file what is required.

Thanks,

Patty Urias

Subject: RE: Univ Blk 9 5AU WBD and History

I believe the well was producing from both Laterals before we shut it in.

I hope the operators have been putting in accurate downtime for this well – just have been using “Downhole: Other” rather than “Surface: S/I Long Term”

Josh, what should we show shut-in date?
Lisa, can we put this well on downtime? I need to update University Lands on this well and we had previously told them it was shut in.

Thanks for your help,

Patty – I believe we shut this well in and are choosing not to produce it for the time being. The surface drive has been released and the last well test was 12/30/2019.

I can do the research on the well history and determine which lateral(s) we were producing from back in 2019 if you want me to! But we do not currently have plans to return this well to production.
Please let me know if I need to confirm if we were producing from both laterals!

Subject: RE: Univ Blk 9 5AU WBD and History

I really do not remember what the lady is wanting other than if we are producing from both laterals, we need to file a W2 showing both laterals open.
Here are copies of the well tests provided during the time the well was supposedly shut in and should not have a well test and therefore production. If these tests are not

correct, we will need to get production accounting to refile. Please review the tests and let us know if they are accurate or entered under the well in error. I am looping in Lisa Veloski.

Thanks,

Patty Urias

Hi Josh, University Lands is just now getting back to me on this well and found W10s submitted on this well from 2018 to 2020, showing the well is producing. Per our conversation: he states that both the laterals are open and we normally would produce out of both laterals, but the well is shut-in right now and shut in day was 4/2018.

Can you please explain/advise?
Thanks for your help,

Good Morning, Mary,
I spoke with our engineer that handles this area and he states that both the laterals are open and we normally would produce out of both laterals, but the well is shut-in right now.

Please advise if you require any additional information,
