**Purpose:** New Production Well  
**Location:** Survey-UL; Abstract-U182; Block-9; Section-12

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to the base of the Santa Rosa, which is estimated to occur at a depth of 875 feet, must be protected. Moreover, the fresh water contained in the interval from the land surface to a depth of 475 feet must be isolated from water in underlying beds.

This recommendation is applicable for all wells drilled in this Section 12.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 05/09/2023. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.
