Subject: RE: State of Texas DF 3 and DF6 Wells

Hi Michelle !

I have another situation that appears to be similar to what happened on the State of Texas FW 7H well we dealt with last month.

- A. There are two wells, State of Texas DF 3 and State of Texas DF 6 that show as being shut in UT Lands (Screen shots below) as of 5/18.
- B. These two wells are both tied to RRC# 26174 UT Lease # 42932
- C. The State of Texas DF1 well was recently P&A'd and was also tied to RRC # 26174 and UT #42932
- D. s all the wells are now either shut in or P&A'd, gas reporting was closed as of the end of April
- E. While the DF3 and DF 6 wells did not have any production for 6/18-8/18, they have been steadily producing from 9/18 onwards so it appears they were turned back on.
- F. Attached is some W-10 information for each.

Is this enough to allow you to reactivate the State of Texas DF3 and DF6 wells?

Thanks!!

Bruce
